Re: Request for Product Information

Dear Mr. Rasner:

We have been requested by our Client, Advance Science Manufacturing, Inc., to respond to your request regarding the contents of the chips you are currently purchasing from our Client. As you are aware, the make up of the chips are trade secrets and thus the reason why we are responding to your inquiry.

While we are not at liberty to reveal the ingredients, we can definitively confirm that there are no controlled substances or regulated chemicals in the chips. Controlled substances and regulated chemicals as those terms are defined by the laws of the United States federal government.

The products manufactured by Advance Science Manufacturing, Inc. for Cieaura, LLC include charged transparent holographic chips labeled "Pure Relief", "Pure Energy", "Rest Quiet", "CX2" "Sinus Allergy Relief", and "EMF". These products are comprised of a 2 or 3 ply hologram made up of a polyurethane film 20 to 30 microns thick. The adhesive on the back of the hologram is chemically made up of:

n-butyl acrylate ----- C7H12O2
acrylic acid/propenoic acid ----- C3H4O2
ethyl methacrylate ---- C6H10O2
methyl methacrylate ---- C5H8O2

As stated above, there are no other drugs or chemicals in these products. The following are specifically identified as not being present in any of the aforementioned products:

1. Anabolic Agents (steroids)
 - a. Androstenedione Boldenone
 - b. DHEA Nandrolone Testosterone
 - c. THG (tetrahydrogestrinone)
 - d. 19-norandrostenedione
 - e. and related compounds

2. Stimulants
 - a. Cocaine
 - b. Ephedrine (ma huang)
 - c. Methamphetamine
 - d. Synephrine (citrus aurantium, zhi shi, bitter orange)
 - e. and related products

3. Street Drugs
 - a. Heroin
 - b. Marijuana
 - c. THC (tetrahydrocannabinol)

4. Diuretics and Urine Manipulators
 - a. Bumetanide
 - b. Probenicid
 - c. Finasteride (Propecia)
 - d. and related compounds

5. Peptide Hormones and Analogues
 - a. Erythropoietin (EPO)
 - b. Human growth hormone (HGH)
 - c. and related compounds

6. Anti-Estrogens
 - a. Clomiphene (Clomid)
 - b. Tamoxifen
 - c. and related compounds

7. Beta-2 Agonists
 - a. Formoterol
 - b. Salmeterol
 - c. and related compounds

Please allow me to point out that the products are all non transdermal. In fact, our Client has advised us that all the products can be worn on the clothing and achieve expected results without coming in contact with the skin. I hope that this information proves helpful. Should you need additional verification, please feel free to give us a call.

Sincerely,

Alan R. Turen
